Washburn University .....	24
Wichita State University .....	25
Institutional Endorsements Listed Alphabetically By Program .....	28

## PREFACE

This directory is made available by the Kansas State Board of Education as a reference for educators and others interested in approved professional education programs at Kansas colleges and universities. The directory includes a listing by institutions of programs and levels of endorsements, a listing by endorsement areas of all approved programs, and an alphabetical listing of all endorsements with their code numbers. Since the development of approved programs is a continuous process and changes occur annually, updates of these listings will be published each year after approved status is determined for the institutions.

Included in the institution listings are the 22 colleges and universities with approved professional education programs plus the Associated Colleges of Central Kansas (ACCK). ACCK is a consortium of institutions including Bethany College, Bethel College, Kansas Wesleyan University, McPherson College, Sterling College, and Tabor College. This consortium has approved programs in special education only. Although all recommendations for these programs come from the institutions, ACCK has been included in this directory because students may want to contact the consortium office directly for information about programs offered at the ACCK site.

Every effort has been made to assure the correctness of the contents of this directory, but it is recommended that the reader validate the specific information and verify whether the program is still being offered by contacting the certification officer at the institution. Some approved programs are not stand-alone programs, i.e. may require previous or simultaneous completion of another program in order to receive an institutional recommendation for the subject area. For example, an American History program might require simultaneous completion of World History and Political Science programs. It is always important to ask an institution if an approved program is a stand-alone program. It is also advisable to verify the grade level of the program--early childhood (EC, pre-kindergarten), elementary (K-9), middle (5-9), junior high (7-9), secondary (7-12), and elementary/secondary (K-12).

Programs are reviewed every five years to determine compliance with the competencies listed in the Kansas State Board of Education publication entitled Certification and Teacher Education Regulations. A college or university verification that a program has been completed and passage of the state certification examination entitles the applicant to Kansas certification with the appropriate endorsements.

We are hopeful that this publication will be useful to all interested in the preparation of educational personnel in Kansas.

# Education Priorities for a New Century

The Kansas State Board of Education is charged with the general supervision of public education and other educational interests in the state. While clearly acknowledging the role and importance of local control, the State Board of Education has the responsibility to provide direction and leadership for the supervision of all state educational institutions under its jurisdiction.

With this in mind the Board has adopted the following mission:

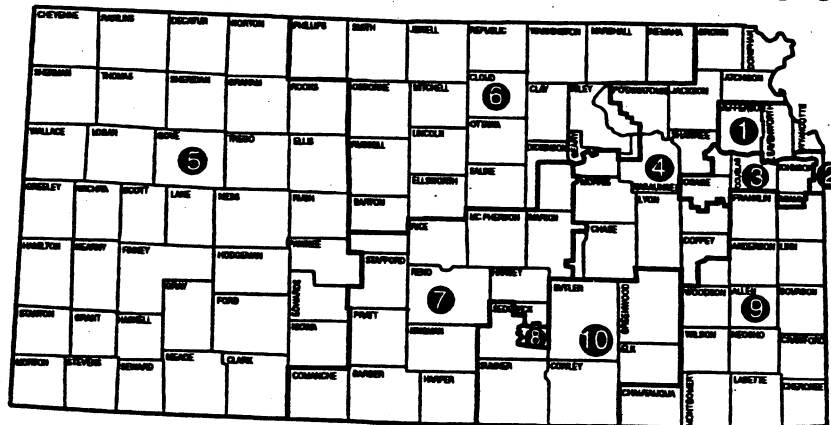

**The Kansas State Board of Education promotes student academic achievement by providing educational vision, leadership, opportunity, accountability, and advocacy for all.**

The Board believes that focusing on this mission will lead to an educational system which is embodied in the following vision statement:

**Schools will work with families and communities to prepare each student with the living, learning, and working skills and values necessary for caring, productive, and fulfilling participation in our changing society.**

To this end the State Board has established the following priorities to guide its work to begin a new century:

- Improve teaching in Kansas schools utilizing performance measurement for teachers and creative approaches to effective teacher recruitment, preparation, and development.
- Raise the achievement of students with an emphasis on low achievers to acquire basic academic skills.
- Continuously improve state curriculum standards and assessments.
- Address the needs created by changing enrollment trends.
- Ensure that students read at the appropriate level, including diagnosis of skills and the use of effective interventions.
- Ready children to learn by supporting families with quality early childhood and primary programs.
